

## Math 107 Analytic Geometry and Calculus II Section 150

**Lecture:** TR 9:30-10:45 Avery Hall (AVH) 115 **Recitations:** WF 9:30-10:20 [151]  
Avery Hall (AVH) 115, Doug Heltibridle [152] Henzlik Hall [HENZ] 36, Nora Youngs  
[153] Avery Hall (AVH) 118, Brittney Hinds [154] Military and Naval [M&N] B6,  
Andrew Ray

**Instructor:** Mark Brittenham **Office:** Avery Hall (AVH) 317 **Telephone:** (47)2-7222 **E-mail:** mbrittenham2@math.unl.edu **WWW:** <http://www.math.unl.edu/~mbrittenham2/>  
**WWW pages for this class:** <http://www.math.unl.edu/~mbrittenham2/classwk/107s10/>

(There you will find copies of every handout from class, dates for exams, review materials, etc.)

**Office Hours:** (tentatively) Mo 12:00 - 1:00, Tu 1:00-1:50, and We 10:30 - 11:30, and whenever you can find me in my office and I'm not horrendously busy. You are also quite welcome to make an appointment for any other time; this is easiest to arrange by email or just before or after class. Any alteration of these hours will be announced in class.

**Text:** *University Calculus*, by Hass, Weir, and Thomas (Addison-Wesley, 2007).

**ACE outcome 3:** This course satisfies ACE Outcome 3. You will apply mathematical reasoning and computations to draw conclusions, solve problems, and learn to check to see if your answer is reasonable. Your instructor will provide examples, you will discuss them in class, and you will practice with numerous homework problems. The exams will test how well you've mastered the material.

This course, as the name is intended to imply, is the second of several where you learn the basics of what we call calculus. Our goal for the semester is to cover approximately the second third of the text. In particular, we will cover sections from the following chapters of the book (although not necessarily in this order):

Ch. 5, Integration: sections 5.4 thru 5.5 Ch. 6, Applications of Definite Integrals: sections 6.1 thru 6.3, 6.5 thru 6.6 Ch. 7, Techniques of Integration: sections 7.1 thru 7.7 Ch. 8, Infinite Sequences and Series: sections 8.1 thru 8.9 Ch. 9, Polar Coordinates and Conics: sections 9.1 thru 9.3 Ch. 10, Vectors and the Geometry of Space: sections 10.1 thru 10.3, 10.5 Ch. 11, Vector-Valued Functions and Motion in Space: sections 11.1 thru 11.3

**Homework** will be assigned from each section, as we finish it. It is an essential ingredient to the course - as with almost all of mathematics, we learn best by doing (again and again and ...). Cooperation with other students on these assignments is acceptable, and even encouraged. However, you should make sure you are understanding the process of finding the solution, on your own - after all, you get to bring only one brain to exams (and it can't be someone else's). For the same reason, I also recommend that you try working each problem on your own, first. A small selection of the homework problems will be collected, graded, and returned; your homework grades will contribute up to 50 points toward your total grade. You should treat the list of assigned problems as an absolute minimum collection of problems to work to help you to review the material. For any

problem that gives you difficulty you should work problems in its vicinity, since they will focus on similar skills.

**Quizzes** will be given in recitation section every Friday that we do not have a scheduled exam. These will typically consist of one problem modelled on the homework assignments from the sections covered up until the Tuesday prior to the quiz. The quizzes will contribute up to 100 of the points toward your total. No make-up quizzes will be allowed, but your lowest two quiz grades will be dropped before computing your score; a missed quiz will be counted as a 0 for this purpose.

**Midterm exams** will be given three times during the semester, in recitation class, approximately every five weeks - the specific dates are (currently) February 19, April 2, and April 23. Any deviation from this schedule will be announced well in advance. Each exam will contribute up to 100 points toward your grade. You can take a make-up exam only if there are compelling reasons (a doctor SAYS you were sick, jury duty, etc.) for you to miss an exam. Make-up exams tend to be harder than the originals (because make-up exams are harder to write!).

A **Gateway Exam** will test your mastery of integration techniques. It consists of 7 questions, and you must pass it with a score of 6 out of 7 or better to receive full credit for the exam. No partial credit is awarded; the answer must be completely correct. You will take the exam on paper in recitation class shortly after we have covered the necessary material. If you do not pass it the first time you take it, you may retake the exam, up to once a (week)day, at the College Testing Center (Burnett 127), until March 26. A picture ID will be required when taking the exam at the CTC. The gateway exam will contribute up to 50 points toward your total. No calculators, books, or notes are allowed while taking the gateway exam.

A **Project** will be assigned for you to work in small groups of no fewer than 3 and no more than 5 people. Students from different recitation sections in our course are welcome to form a group. The project will explore a longer and more open-ended question than a typical homework or exam problem. The goal of the project is two-fold: you and your fellow group-members will solve a more challenging problem, and you will write a report on your work, describing background, methods, and conclusions. Your group will submit a written report on the project and you will be graded on both the quality of both the mathematical solution and of the exposition. The project will contribute up to 50 points towards your total.

Finally, there will be a regularly scheduled **Final Exam** on Thursday, May 6, from 6:00 to 8:00pm. [Note: that this time is not based on the time that the course meets; it is common to all sections of Math 107.] The final will cover the entire course. It will contribute up to 200 points toward your final grade. In accordance with department policy, you will be allowed to bring one 3×5 card with your own hand-written notes to the final exam.

**Your course grade** will be calculated numerically using the above amounts, to give a total out of 750 points ( $= 50 + 100 + 3 \times 100 + 50 + 50 + 200$ ), and will be converted to a letter grade based partly on the overall average of the class. However, a score of 90% or better will guarantee some kind of **A**, 80% or better some sort of **B**, 70% or better a flavor of **C**, and 60% or better a **D**.

**Calculators:** A graphing calculator may be useful for this course, but it is not required. The TI-83, 84 and 86 are all reasonable options. No calculators of any kind may be used during the gateway exam. Calculators may be used during the other quizzes and exams (although it is not necessarily recommended); however, calculators other than those above require the approval of the instructor prior to use. A calculator with a built-in computer algebra system (CAS), such as the TI-89, TI-92, TI-Nspire, HP-40, HP-41, Casio ALGEBRA FX 2.0, and Casio Classpad 300 and 330, may not be used. A cell phone calculator cannot be used during a quiz or exam.

**Cell phones** should be silenced for the duration of all classes, and extreme restraint should be exercised in answering a call during class. If you feel that you must answer a call, please excuse yourself from the room before beginning to take the call.

The **Math Resource Center** is located in Avery 013B, and students in Math 107 are encouraged to use this additional resource if they have questions related to this course, or as a place to meet and discuss group projects. Hours for the MRC are MTWR 12:30 - 8:30 pm, F 12:30 - 2:30 pm, and Su 1:00 - 5:00pm.

**Stay current!** In mathematics, new concepts continually rely upon the mastery of old ones; it is therefore essential that you thoroughly understand each new topic before moving on. Our classes are an important opportunity for you to ask questions; to make sure that you are understanding concepts correctly. Speak up! It's your education at stake. Make every effort to resist the temptation to put off work, and to fall behind. Every topic has to be gotten through, not around. And it's a lot easier to read 50 pages in a week than it is in a day. Try to do some mathematics every single day. **Class attendance** is probably your best way to insure that you will keep up with the material, and make sure that you understand all of the concepts. [And on a more pragmatic note, the instructor writes the exams, so it pays to know what the instructor said!] Even more, **stay ahead!** You are strongly encouraged to read the section to be covered in class prior to its presentation in lecture; this will both improve your ability to follow the lecture and help to focus your attention on any areas where extra effort on your part will be required.

### Some important academic dates

**Jan. 11** First day of classes. **Jan. 18** Martin Luther King Day - no classes. **Jan. 22** Last day to withdraw from a course without a 'W'. **Mar. 5** Last day to change to or from P/NP. **Mar. 14-18** Spring break - no classes. **Apr. 9** Last day to withdraw from a course. **May 1** Last day of classes.

**Departmental Grading Appeals Policy:** The Department of Mathematics does not tolerate discrimination or harassment on the basis of race, gender, religion or sexual orientation. If you believe you have been subject to such discrimination or harassment, in this or any math course, please contact the Department. If, for this or any other reason, you believe your grade was assigned incorrectly or capriciously, appeals may be made (in order) to the instructor, the Department Chair, the Departmental Grading Appeals Committee, the College Grading Appeals Committee, and the University Grading Appeals Committee.

### Homework Problems, by section

Section 5.4, p.351: 5, 8, 9, 14, 20, 25, 29, 30, 34, 35, 41, 44, 57, 74  
Section 5.5, p.358: 1, 2, 6, 8, 14, 19, 22, 23, 32, 37, 40, 51, 61, 64  
Section 7.1, p.453: 1, 3, 6, 7, 8, 10, 13, 20, 21, 25, 28  
Section 7.2, p.460: 1, 4, 5, 7, 11, 16, 24, 25, 29, 34, 37  
Section 7.3, p.463: 1, 4, 5, 7, 11, 15, 24, 25, 32  
Section 7.4, p.469: 1, 3, 5, 10, 12, 16, 20, 21, 25, 31  
Section 7.5, p.476: 15, 21, 37, 40  
Section 7.6, p.484: 15, 19, 20  
Section 7.7, p.495: 1, 2, 4, 7, 10, 13, 17, 24, 25, 35, 42, 51, 52, 55, 58, 66  
Section 6.1, p.399: 1, 5, 8, 15, 17, 20, 23  
Section 6.2, p.406: 2, 3, 9, 10, 15, 16, 17  
Section 6.3, p.413: 1, 2, 3, 8, 9, 11, 17  
Section 6.5, p.428: 6, 8, 9, 12, 16, 23, 26, 35  
Section 6.6, p.433: 2, 5, 7, 8, 13, 17, 18, 23  
Section 8.1, p.511: 4, 7, 11, 16, 19, 21, 23, 26, 27, 32, 36, 41, 43, 45, 50, 69, 75  
Section 8.2, p.522: 1, 3, 5, 7, 8, 13, 16, 21, 23, 24, 25, 26, 29, 36, 45, 48, 49, 51, 56  
Section 8.3, p.527: 2, 4, 6, 9, 11, 12, 16, 20, 25  
Section 8.4, p.532: 2, 3, 4, 6, 10, 11, 20, 21, 25, 34, 35  
Section 8.5, p.536: 1, 3, 4, 6, 7, 9, 12, 14, 15, 18, 21, 23, 27, 30, 41  
Section 8.6, p.542: 2, 3, 6, 9, 12, 13, 15, 20, 25, 26, 32, 36, 37, 45, 47  
Section 8.7, p.552: 2, 3, 6, 7, 9, 11, 13, 22, 23, 25, 27  
Section 8.8, p.558: 1, 3, 6, 8, 11, 13, 15, 18, 22, 23, 25, 26, 27  
Section 8.9, p.567: 2, 5, 8, 15, 17, 19, 21, 23, 25, 27, 29, 33  
Section 9.1, p.581: 1, 4, 6(a, d, h), 8, 9, 11, 13, 17, 24, 26, 27, 30, 45, 53, 55  
Section 9.2, p.585: 1, 4, 5, 7, 17-19, 21(a), 24(a)  
Section 9.3, p.589: 2, 3, 7, 9, 13, 14, 17, 19, 23, 24  
Section 10.1, p.617: 1, 3, 6, 9, 13, 15, 17, 20, 22, 29, 35, 38, 41, 45, 49, 53  
Section 10.2, p.626: 3, 6, 9, 10, 13, 15, 17, 21, 23, 25, 28, 33, 40, 41  
Section 10.3, p.634: 1, 3, 8, 13, 15, 27, 29, 31  
Section 10.5, p.650: 1, 2, 6, 16, 19  
Section 11.1, p.670: 1, 4, 5, 8, 9, 11, 15, 16, 19, 21, 23(a, c)  
Section 11.2, p.676: 2, 3, 4, 6, 7, 10, 11, 13, 17  
Section 11.3, p.681: 1, 3, 5, 6, 9, 11, 12
