## Math 871 Problem Set 3 Replacement

(\*) 15. Show that if  $\mathcal{B}$  and  $\mathcal{B}'$  are both bases for topologies on X, then the set

$$\mathcal{B}^{\prime\prime}=\{B\cap B^{\prime}:\,B\in\mathcal{B}\text{ and }B^{\prime}\in\mathcal{B}^{\prime}\}$$

is also a basis for a topology on X , and that the topology it generates is the coarsest topology on X containing both  $\mathcal B$  and  $\mathcal B'$  .
